DETAILED ACTION

Remarks

1. Claims 1-25 were cancelled by preliminary amendment filed January 6, 2006. Claims 26-74 are currently pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 26-36, drawn to a composition.

Group II, claim(s) 37-56 and 66-72, drawn to a sample preparing unit and device comprising said unit.

Group III, claim(s) 57-65, drawn to a method of preparing nucleic acid samples.

Group IV, claim(s) 73 and 74, drawn to a nucleic acid amplification method.

- 3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The prior art of Chan (US 6,355,420 B1) teaches a composition (see column 93, lines 32-38) comprising the following elements:
 - (a) a solution comprising a polymerase, specifically Taq polymerase
 - (b) MgCl₂ and also another alkali metal halide (KCl)
 - (c) dNTPs

Art Unit: 1637

(d) a primer

(e) a stabilizer, specifically gelatin

(f) substances for detection of a reaction product, specifically the fluorescently labeled

dNTPs.

Since the prior art of Chan anticipates the instant claim 26, the claims lack a special technical

feature linking them over the prior art, and therefore, a lack of unity requirement is proper.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an

election of a species or invention to be examined even though the requirement be traversed (37

CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve

a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated

as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record showing the

inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the

evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela Bertagna whose telephone number is 571-272-8291. The examiner can normally be reached on

M-F, 7:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 571-272-0782. The fax phone number for the organization where this application or proceeding

is assigned is 571-273-8300.
